Frontend: HTML5, CSS3, JavaScript ES6+, React, Bootstrap, JQuery, TypeScript, Angular

Backend: Node.js, Express.js, Python, Flask, C#, ASP.NET Core, Java

Databases: SQL, MongoDB, PostgreSQL, DynamoDB

Cloud and DevOps: Circle CI, Netlify, AWS, Render, Azure, Jira, S3

Testing: Vitest, Insomnia, Apache Jmeter, Postman, Selenium, SoapUI, Practitest, Cypress

Tools & Practices: Restful APIs, GraphQL, Responsive Design, Agile, Scrum, Vite, Git, Apollo, Sequelize, GitHub Actions, CI/CD

EDUCATION

UNC Charlotte - *Full Stack Certificate*

August 2024 - January 2025

Covered MERN, PERN, and FReMP stack with end-to-end deployment pipelines. Built and deployed real-world projects using GitHub, CircleCI, and cloud platforms.

Greenville Technical College, Greenville SC - *Computer Science*

August 2013 - May 2015

Completed core programming and computer science foundations

PROFESSIONAL EXPERIENCE

IT Application Support Analyst - *World Acceptance Corporation, Greenville,*
August 2018 - Current

April 2024 - Current

- Developed a React + ASP.NET Core customer incident tracking app with C#, TypeScript, and CSS.
- Lead support for 15+ production apps; designed testing flows with Selenium and SoapUI.
- Participated in roadmap planning and rollout discussions for key applications.
- Educate and direct Service Desk Team to be able to handle low level support for all production applications.
- Mentored service desk team on diagnosing and escalating production issues.

IT Support Analyst

February 2021 - April 2024

- Became T2 support for major internal systems using SQL Server and test environments.
- Conducted backend SQL analysis and automated issue replication to reduce ticket volume.
- Performed load testing with Apache Jmeter; created Selenium scripts for regression checks.

IT Quality Analyst

November 2019 - February 2021

- Developed and executed test cases for REST APIs using SoapUI and PractiTest.
- Automated web testing using Selenium and Java for applications like Loan Manager and Audit.
- Led QA for major integrations with third-party services.

Branch Support Associate

August 2019 - November 2019

- Created Excel dashboards to track operational KPIs for management.
- Supported technical rollouts and trained users on new loan application workflows.

Customer Care Associate

August 2018 - August 2019

- Automated internal spreadsheet processes to improve workflow efficiency.
- Handled payment processing issues, garnishments, and customer hardship support.

PROJECTS & PORTFOLIO

Available at: [EslickJR GitHub](#)

- Company Site Redesigns: Modernized and deployed responsive websites for small businesses
 - [Golden Grove Bicycles](#)
 - [Blush Midtown Greenville Salon](#)
- Incident Tracker App: Full-stack project for internal IT ticketing using React, C#, and SQL.
- Wireframe Builder Tool: Created a drag-and-drop wireframe interface to quickly and visually communicate UI layouts and design ideas with other developers
- Community Kanban Board: Developed a public task board with user login, post submissions, and status columns using React, Node.js, and MongoDB.
- Anime Battle Simulator: Full-stack interactive game that allows users to select anime characters and battle others' teams; implemented custom API-drive stat comparisons.
- Sportscast Forecast: Combined weather APIs with OpenAI prompting to output playful "sportscaster-style" weather updates.
- Book Wishlist App: Built a CRUD-based reading tracker with Google Books API integration; allows users to save, mark as read, and manage their wishlists.
- Developer Portfolio: Fully responsive personal portfolio showcasing projects, timeline, and skills, built with React and deployed via Netlify and Github Actions.

ADDITIONAL

- US Citizen – Open to remote and hybrid roles – Strong soft skills and leadership experience.
