SUMMARY

Certified Full Stack Web Developer with 7+ years of progressive IT experience spanning application support, software development, quality assurance, and production systems. Experienced building and maintaining full-stack applications with React, ASP.NET Core, C#, TypeScript, SQL, and cloud technologies while supporting enterprise-scale environments. Adept at solving complex technical problems, automating workflows, and collaborating across business and engineering teams. Proficient in leveraging AI-assisted development tools to accelerate development, improve code quality, troubleshoot issues, and enhance productivity throughout the software development lifecycle.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript ES6+, React, Bootstrap, JQuery, TypeScript, Angular

Backend: Node.js, Express.js, Python, Flask, C#, ASP.NET Core, Java

Databases: SQL, MongoDB, PostgreSQL, DynamoDB

Cloud and DevOps: Circle CI, Netlify, AWS, Render, Azure, Jira, S3

Testing: Vitest, Insomnia, Apache Jmeter, Postman, Selenium, SoapUI, Practitest, Cypress

Tools & Practices: Restful APIs, GraphQL, Responsive Design, Agile, Scrum, Vite, Git, Apollo, Sequelize, GitHub Actions, CI/CD, AI-Assisted Development

EDUCATION

UNC Charlotte - *Full Stack Web Development Certificate*

August 2024 - January 2025

Completed immersive training across MERN, PERN, and FReMP stacks. Built and deployed production-ready applications using GitHub, CircleCI, AWS, and cloud hosting platforms.

Greenville Technical College, Greenville SC - *Computer Science*

August 2013 - May 2015

Completed coursework in programming fundamentals, algorithms, and computer science.

PROFESSIONAL EXPERIENCE

IT Application Support Analyst - *World Acceptance Corporation, Greenville,*
August 2018 - Current

April 2024 - Current

- Designed and developed an internal customer incident tracking application using React, ASP.NET Core, C#, TypeScript, CSS, and SQL to streamline issue tracking and support workflows.
- Built a **Live Check Validator** application that automated validation of live check data, improving operational efficiency, reducing manual verification efforts, and increasing processing accuracy.

- Supported and maintained more than 15 enterprise production applications across multiple business units.
- Developed automated testing workflows using Selenium and SoapUI to improve release quality and reduce regression issues.
- Partnered with business stakeholders and development teams during roadmap planning, feature rollouts, and production releases.
- Created documentation and trained Service Desk analysts to resolve Tier 1 issues, reducing escalations and improving first-contact resolution.
- Mentored junior support analysts on troubleshooting methodologies, production support, and application diagnostics.

IT Support Analyst

February 2021 - April 2024

- Served as Tier II support for critical enterprise applications and SQL Server environments.
- Performed SQL analysis, backend troubleshooting, and issue replication to identify production defects.
- Automated regression testing and load testing using Selenium and Apache JMeter.
- Collaborated with development teams to validate fixes prior to production deployment.

IT Quality Analyst

November 2019 - February 2021

- Developed and executed API and integration test plans using SoapUI and PractiTest.
- Automated web application testing using Selenium and Java.
- Led quality assurance efforts for enterprise applications and third-party integrations.
- Identified software defects early in the development lifecycle, improving release stability.

Branch Support Associate

August 2019 - November 2019

- Developed Excel dashboards to monitor operational KPIs and business performance.
- Supported software rollouts and trained branch employees on new application workflows.

Customer Care Associate

August 2018 - August 2019

- Automated internal spreadsheet processes to improve reporting efficiency.
- Resolved payment processing, hardship, and garnishment issues while maintaining high customer satisfaction.

PROJECTS & PORTFOLIO

Available at: [EslickJR GitHub](#)

Company Website Redesigns

- Redesigned and deployed responsive business websites for Golden Grove Bicycles and Blush Midtown Greenville Salon.

Incident Tracker

- Full-stack enterprise-style ticket management application built with React, ASP.NET Core, C#, and SQL.

Wireframe Builder

- Built a drag-and-drop UI wireframing application that allows developers to rapidly prototype interfaces and communicate design concepts.

Community Kanban Board

- Developed a collaborative project management platform featuring authentication, user-generated tasks, and workflow management using React, Node.js, Express, and MongoDB.

Anime Battle Simulator

- Created a full-stack interactive game utilizing external APIs for dynamic character statistics and battle simulations.

Sportscast Forecast

- Integrated weather APIs with OpenAI-powered prompting to generate entertaining sportscaster-style weather reports.

Book Wishlist Application

- Built a CRUD application using the Google Books API allowing users to organize and track reading lists.

Restaurant Randomizer

- Developing a location-based restaurant discovery application that filters nearby restaurants based on user preferences and randomly selects a destination using an interactive spin feature; currently refining UI/UX, styling, and additional functionality prior to deployment.

Developer Portfolio

- Designed and deployed a responsive React portfolio with automated CI/CD deployment through GitHub Actions and Netlify.

ADDITIONAL

- U.S. Citizen
- Open to Remote, Hybrid, and On-site Opportunities
- Strong leadership, mentoring, and cross-functional collaboration experience
